

*"A miracle contradicts not the laws of nature,
but only our ideas about the laws of nature."
(Aurelius Augustine)*

Pyramids - New Discoveries & New Riddles

In the long history of studies and research of the pyramids, a real breakthrough was the discovery of the Pyramids of the Golden Section in the 1980s by a scientist and mathematician Alexander Golod. Thousands of studies and experiments have shown that around the Golden Section Pyramid, vegetation thrives, water bodies revive, and the air is purified. In the zone of pyramid influence, the level of stress decreases, the body's resistance to infections increases and the immune system is activated. Pyramids help fight the most serious diseases.

THE 44-METER HIGH GOLOD'S PYRAMID NEAR MOSCOW

After the construction in 1999 of the largest 44-meter high Golod's Pyramid, there was no flu epidemic in Moscow for 3 years. During the SARS epidemic in 2001-2002, the pyramids were successfully tested in Toronto, Singapore, Hong Kong, and Novosibirsk (Russia).

NEW DISCOVERIES

Analysis of a large volume of information, events and facts collected from the mini-pyramid users and from the Golod's Pyramid visitors led to new discoveries explaining the phenomenon of pyramids.

EFFECT OF THE GEOMETRIC SHAPE OF THE PYRAMID

The first prototypes of the pyramids are the dwellings of primitive people - conical, domed buildings, woven from branches and lianas, covered with leaves, grass, animal skins, domed houses from snow. People chose the shapes of their homes intuitively, based on the conditions of safety, security, reliability, and convenience.

HUMAN BRAIN ASSOCIATES THE PYRAMIDAL SHAPE WITH SAFETY AND STABILITY

These special properties of the pyramids are preserved in the genetic memory of our brain. Modern science has determined the shape of the pyramid as the most stable geometric body. The human brain associates the shape of a pyramid with a sense of security, safety, stability, which in its turn leads to a state of relaxation of the nervous system.

The human brain, in a special way, reacts to the geometric shape of the pyramid. Separate areas of the brain register increased measurement potential, unmistakably distinguishing pyramids from many other geometric bodies. This discovery was made in joint experiments of the company Peer, Life and specialists from the Brain Institute.

HOW PYRAMIDS CAN PROTECT US

<https://meduza.io/shapito/2017/05/30/uragan-razrushil-piramidu-goloda-v-podmoskovie-srazu-posle-yazycheskogo-obryada>

In May 2017, a hurricane swept over Moscow, knocking down thousands of trees and damaging dozens of buildings. More than 2,000 cars were destroyed, 27 people were killed, and the 44-meter high pyramid was destroyed. However, subsequent analysis of the event showed:

- in the zone of influence of the pyramid, buildings and cars were not damaged, there were no fallen trees and there were no human casualties;
- an abnormally low wind speed was recorded in the pyramid's influence zone;
- the crash of the pyramid was similar to the controlled demolition of an old building - the lightweight structures of the pyramid did not scatter, but fell down on the square of the base of the pyramid;

Alexander Golod - "The pyramid was designed to last for 20 years, after which the pyramid was to be dismantled, and on the same area, it was planned to erect a new pyramid with a height of 144 meters. The pyramid "itself" prepared a place for the construction of a new one."

WATER DIDN'T FREEZE AT -38°C INSIDE A PYRAMID – UNEXPLAINED PHENOMENON

https://www.youtube.com/watch?v=eguQsHoNdac&feature=emb_logo

One of the fundamental discoveries made by Alexander Golod was the effect of non-freezing water. In 1997, the following phenomenon was discovered: ordinary bottled water placed in a 22-meter high pyramid did not freeze at -38°C, however, with a slight shake of the bottle, the water almost instantly turned into ice.

Healing Power of Pyramidal Water

Water that has been charged in or by a pyramid is called “[pyramidal](#)” water. It really has unique healing properties. The thing is that the strongest flow of energy from a pyramid structures normal water, endowing it with a special force that acts like the force of a pendulum, bringing to equilibrium the entire huge energy system of the Earth and the small energy system of a man. It synchronizes these two systems, making them work in a single harmonious rhythm.

Numerous cases have shown that pyramidal water has a number of unique properties.

- “Water is the most mysterious substance on earth, many secrets of which we still have to learn.” - Prof. N. S. (Japan)
- “One of such secrets is the pyramidal water of Alexander Golod. In nature, water exists in 3 states of aggregation: liquid, gaseous, solid. Obviously, pyramidal water is the 4th state of aggregation, which can be conditionally defined as “liquid ice.” - Kevin M., physics (Boston)
- “Dear Al Eph. I would like to express my deep gratitude and appreciation to you and your staff for your unique matrices and pyramidal water, using which, according to your recommendations, I became the Olympic Gold Medalist. Your Pyramidal Water is a truly phenomenal energy drink” - N.G., 2004Olympic champion
- “We have successfully used pyramidal water in the department of pathology of premature newborns, where it was given the name “healing water” - D.B., a pediatrician at a children's hospital

PYRAMID EXTRASENSORY PROPERTIES

A person perceives the world around him with the help of five senses: sight, hearing, smell, taste, and touch. However, it is known that there are people with abilities that go beyond the ordinary perception of the world. They are called psychics. Research by scientists from the University of Massachusetts School of Medicine showed that our distant descendants also had such abilities and could, for example, navigate in space by magnetic and electric fields, just as fish, birds, insects, and mammals do now. They do this, as neuroscientist Stephen Reppert discovered during experiments, using a special protein called cryptochrome, which is inside the eyes. Further research has shown that humans also have this kind of cryptochrome, but it doesn't work.

Premonitions

Long-term contacts with the Golden Section Pyramid users have opened up the possibilities of the pyramids, to activate such extra abilities in a person as a premonition of dangerous events. As you know, birds, snakes, fish, some animals, frogs feel the approach of earthquakes, tsunamis, hurricanes, volcanic eruptions. Many stories are known of how people had a premonition of danger.

We managed to collect unique examples of manifestations of the ability to anticipate future dangerous events from the Golden Section Pyramid users.

*

"I had a dream that a strong wind destroyed my country house; I got up very early and decided to go and check. All the way I was in some kind of anxiety. But as soon as I approached the site, I saw my house in the distance, safe and sound, I calmed down. But then, during the day, amazing things began to happen. In the news on TV they broadcast about a hurricane that swept through Moscow, and then my wife called me and said that a tree that had been knocked down by a hurricane fell on the parking lot of my Auto and crashed the neighbor's car. My trip to the country house saved my car." - Oleg, Moscow

*

"My husband and daughter and I went to visit my parents, who live in a high-mountain village. On the way, my daughter suddenly wanted to use the toilet, and we had to stop by the nearest gas station. Having left on the road after a short delay and having driven 5-7 km, we encountered an unexpected obstacle - we stopped at a pile of me, which blocked the road. Several cars were in front of us. Discussing what had happened with the drivers, we realized with horror that if it had not been for our daughter's toilet, we could have gotten under this rockfall." - Eteri Sh, Georgia

*

A family of 4 people (husband, wife, and two children) went on a trip by car. On the eve, the husband felt some kind of unexplained alarm. He expressed his doubts and desires to postpone the trip, but his wife insisted that this was all prejudice. On a long journey, the car gets into a serious accident. The wife and children escaped with minor injuries and severe fright, and the husband received several fractures, a concussion. It took 3 operations, a long process of treatment and rehabilitation for the head of the family. Doctors and friends called it a real miracle. The chance to survive in such an accident, experts assessed how to win the jackpot. - Hungary.

*

"We were looking forward to the upcoming luxury liner cruise. However, the day before my wife felt unwell and we had to give up the trip. A few days later, we were informed that a coronavirus was found on the ship and the ship was quarantined." - Hong Kong.

*

"I am an interior designer. I like to travel a lot. From each trip I bring local magic souvenirs, amulets, figurines, of which I have collected more than 200x hundred. About 3 years ago, my collection was replenished with a mini-pyramid, after I read a lot about the magical properties of pyramids. And after a while, a real miracle happened that turned my whole life upside down. I have a dream. I go to the subway and feel someone's eyes on me. I lift my head and see the silhouette and contours of the man's face, which quickly disappears. For some reason, every subsequent night I expected a repeat of that dream. But something else happened a week later. Another client called in my office and asked me to meet. When I saw the face of a man who opened the door, I almost fell off the chair; it was a man from my dream. Now this man is my husband, with whom we recently celebrated our first wedding anniversary." - C.C.

*

"While most people dismiss premonitions as coincidences, more and more scientific evidence indicates that foresight is actually an acquired skill that we can all practice and hone, rather than a power possessed by a few exceptional modern oracles." - Julia Mossbridge and Teresa Chung

TO SKEPTICS AND CRITICS

Do you use a refrigerator, TV, iron? Do you take the subway, tram? Do you have a computer, smartphone?

Why are these strange questions? We are talking about the use of [electricity](#), without which it is impossible to imagine modern life. Meanwhile, just about 200 years ago, electricity was classified as a miracle. The first experiments with electricity caused fear, and even an outstanding scientist of that time, Professor Osborne Reindols, authoritatively stated - "Electricity will never become a practical form of power, it is unscientific."

*

Napoleon Bonaparte, on the invention of the parachute by Robert Fulton in 1803, said - "Crowds of adventurers are running around the world and offering imaginary inventions that exist only in their imaginations. These are some charlatans and deceivers who only crave money. The American is one of them. I don't want to hear any more words about Fulton."

*

History is full with such facts:

- "X-rays are chimera." - British physicist Lord Calvin, 1900
- "This radio hobby, nothing more than a tribute to fashion and it will pass very soon." - Thomas Edison, 1922.
- "Space travel is a fairy tale for children." - Richard Wu, President of the British Astronomical Society, 1956

The list is endless.

HISTORY REPEATS ITSELF WITH THE PYRAMID

Obviously, history repeats itself with the pyramid. Scientists deny the effect of the pyramids, since they cannot yet explain them from the point of view of modern knowledge and classify the pyramids as mystic, pseudoscience.

*

"Pyramids are the science of the future - physics, chemistry, biology, medicine. D'Arsonval, an outstanding physiotherapist of the 18th century, wrote, "Medicine of the future will abandon injections and drugs. The old therapeutic arsenal will be replaced by new types of radiation, only some of which we will begin to discover" Pyramids are future medicine, physics, chemistry, and biology." – Alexander Golod

*

"Danish physicist Niels Bohr nailed a horseshoe over his door, which surprised his neighbor:

- Professor, do you really believe that a horseshoe brings good luck?

- Of course I don't believe. But I noticed that a horseshoe brings good luck even to those who don't believe in it.

Instead of a horseshoe, we put a mini-pyramid in our laboratory." - H.H., Nobel Laureate.
